

220 l Equipped Tanks For Diesel AdBlue®/DEF Dispensing

FLO MASTER®
AdBlue® Urea

DESCRIPTION

220 l tanks equipped with electric pumps and 4 m hose with automatic nozzle to ease refilling tasks. Their PE rotomolded manufacturing with extra reinforced wall thickness, make them very sturdy. Their engineered design, including lifting points for forklifts, give them improved manoeuvrability. Include several antispill leakage features such as safety filling cap and large lid with lockable latches. Supplied with made in EU HD 12 V DC electric pumps. They are conform to ADR 1.1.3.1 c/ exemption.
